---

D,

The schedule for the next Gulfco sampling round hasn't been set yet - I plan to work that out next week.

Later,

Subject monthly projected activities for January

Hello RPMs,

1/04/07

I am writing you this email to request input on projected activities. Please let me know if you have any anticipated risk assessment activities (i.e. workload timelines, projected meetings or documents to be reviewed) in the month of **January**. I am giving a synopsis of my activities for each of the current sites that I have right now.

### **Currently**

**FOR GULFCO MARINE MAINTENANCE:** I am working closely with the RPM on risk assessment topics related to sediment water data and the sample analyses. I may be traveling to the site some time this month. I am preparing to review the human health risk assessment for this site.

**FOR TULSA FUELS and MANUFACTURING:** I am waiting for a

9543472

response regarding a document I wrote to ODEQ on the subject of fish sampling from on-site ponds to assess trespasser ingestion risk. I will start telephone conferences this month with ODEQ and contractor risk assessors regarding the progress of the human health risk assessment draft document.

**FOR R & H TROPICANA:** I have been discussing the ongoing developments of R & H Tropicana with the RPM and Cost Recovery Representative. I am preparing to review the human health risk assessment for this site.

**OTHER WORK:**

I am reviewing the Guidance for Evaluating the Oral Bioavailability of Metals in Soils for use in Human Health Risk Assessment for team leader. I have a bi-weekly Risk Assessors meeting for this branch on Wednesday afternoons.

I have monthly RATs (Risk Assessors Teleconference) also on Wednesday afternoons.

I will continue to work on creating an ecological toxicity algorithm with a fellow risk assessor.

I look forward to working more closely with all of you.

Regards,

Dipanjana
